# About Company

**Creek Transitway Ltd RC 1706695, Creek Transitway Inc (Delaware,USA)** is a Nigerian company pioneering the transformation of the Nigerian energy industry by facilitating the utilization of Gas to Power (GTP) and Gas To Mobility (GTM) through innovative bespoke solutions. We specialize in the mainstream adoption of Compressed Natural Gas (CNG) and Liquefied Natural Gas (LNG) as the primary fuel of choice.

Creek Transitway partners with several government entities, private organizations and financial institutions to develop and implement sustainable gas to mobility infrastructure projects, with particular focus on CNG&LNG infrastructure development and deployment, auto-gas conversion technology for light and heavy duty vehicles, diesel generator conversion and comprehensive training programs. We are playing the crucial role of driving growth, reducing cost of energy and creating opportunities in the economy.

## **Wisdom Elijah**

*CEO/Founder  
Creek Transitway Ltd*

# **Welcome Message**

As CEO of Creek Transitway Limited, I am honoured to introduce you to our company, a pioneering force in the mobility and power industry, dedicated to providing sustainable energy solutions and innovations across Nigeria and beyond.

We believe in a cleaner and more efficient energy source by harnessing Natural Gas as the primary fuel for powering mobility and off-grid energy. We have a commitment to excellent service delivery that is affordable and accessible to all. Our journey so far has been shaped by innovation, collaboration and an unwavering commitment to excellence. We have secured key partnerships with industry leaders, and gotten significant investment interest and executed groundbreaking projects that are setting new industry standards.

Thank you for your interest in Creek Transitway. Together, we can drive positive change and make a lasting impact on the future of transportation and power.

# Vision & Mission

## Vision

Our vision is to deliver eco-friendly, energy solutions to our customers, create sustained shareholder value and share our success with our people and our communities resulting in a better place to live built on excellence.

## Mission

Together, we enhancing liveability by providing a clean energy solution ,embraced by our communities and our people city by city.

We are committed to being a market-leading energy solutions provider for transport service providers and businesses that are self generating power for their use. This with long-term growth prospects based on high-quality services and investment in innovation.

# Corporate Goals

## Health & Safety Standards

To ensure highest standards of Health and Safety.

## Service and Value

Provide dignified, affordable, efficient and reliable services

## Customer Driven

Excel in anticipating and responding to customer needs.

## Market Leadership

Maintain a leading market share in all segments in the region.

## Financial Strength

Delivers sustainable profitability in acceptable method.

## Human Resources

Attract, maintain, retain competent and committed staff who share the ideals of the company.

## Community & Environment

Continuously develop strategies that recognize the need to sustain a clean and safe environment.

# Corporate Values

**Customer Focus-** Exceed customer expectations in line with international best practice.

**Integrity-** Be open, honest and sincere. Uphold good corporate governance.

**Initiative And Innovation-** Be business unusual, proactive, drive change and quantifiable strategic performance that consistently create convenience.

**Teamwork-** Work with and support franchisees and customers, colleagues at work and in the industry.

**People Development-** Realize staff potential through training, development and motivation.

**Excellence-** Strive for excellence in all that is done and be a leader in enhancing sustainability through the services and products provided.

# Why Choose Us?

## Technical adequacy for our environment:

Our solution is made for the African environment. All Natural Gas Solutions which may include Gas2Power, Gas4Transport equipments are manufactured based on available international standards and practices with the latest design and technology. We create great experience in the Gas2Power and Gas2Transport solution offered to our clients.

## Increased productivity and higher savings:

The extremely low maintenance cost of our products is based on the quality of products and technical know-how of our team and partners. As we offer an all-in-one integrated solution from Engineering, Procurement & Construction and Supply (EPC & S) so as to ensure constant availability of Gas stock to service our clients facility.

## After Installation service:

We understand that without a qualitative after installation service our customer-client relationship will fail. It is against this background that we ensure availability of quality accessories for scheduled maintenance and well experienced professionals to service our customers. Because of the significance we place on after installation service we are partner with the OEMs for the supply of quality accessories and parts.

# Our Management Team

## Alh. Aminu Baba-Kusa Chairman Board of Directors

**Alhaji Aminu Baba-Kusa** is a distinguished energy industry leader with over 32 years of high-level experience across Nigeria's oil and gas value chain. He retired as Group Executive Director (GED), Business Development of the Nigerian National Petroleum Corporation (NNPC), where he previously also held the positions of GED, Special Services and GED, Commercial & Investments.

During his tenure at NNPC, Alh. Baba-Kusa demonstrated visionary leadership in strategy and enterprise development. Notably, he led the rapid expansion of NNPC Retail Ltd, scaling its retail network from 37 to over 500 stations within eight months, one of the fastest commercial rollouts in the sector. He also spearheaded the establishment of the NNPC Fuel War Room, a national coordination center that successfully addressed long-standing fuel supply disruptions across Nigeria.

As Group General Manager of the Crude Oil Marketing Division, he played a key role in maximizing Nigeria's crude oil value in international markets. His implementation of a transparent and auditable crude oil data tracking system was commended by the Nigeria Extractive Industries Transparency Initiative (NEITI) and remains in use to this day.

His broad industry footprint includes leadership roles at Nigeria LNG Limited, the Nigerian Gas Company, and the Pipelines & Products Marketing Company (PPMC). He also contributed to national energy policy as a member of the National Gas Policy Drafting Committee, where he helped develop frameworks for domestic gas distribution.

Alh. Baba-Kusa is a Member of the UK Institute of Marketing and the Nigerian Institute of Management (MNIM). At Creek Transitway, he brings deep institutional knowledge, strategic oversight, and high-level stakeholder engagement experience to guide the company's mission in gas infrastructure and clean energy deployment across Nigeria.

Our

# Management Team

## Wisdom.E.Benjamin– Chief Executive Officer (Founder)

**Wisdom** is a dynamic Engineer and Business Developer with a robust background in Electrical Electronics Engineering. With nearly 8 years of experience in the energy sector, Wisdom has honed his expertise in developing and implementing innovative energy solutions. His diverse experience spans across automation and instrumentation within the oil and gas industry, as well as substantial experience in the power transmission sector. In addition to his engineering prowess, Wisdom possesses a strong foundation in software development, having successfully deployed IT solutions for both government and private sector organizations. His unique combination of technical expertise and business acumen makes him a visionary leader, driving Creek Transitway towards new horizons in energy and technology.

# Our Management Team

## Ivan Cvek Chief Technical Officer (CTO)

**Ivan** is Ivan Cvek is a highly accomplished instrumentation and engineering expert with over 40 years of experience in the oil and gas industry, spanning Europe, Africa, and global LNG operations. He brings exceptional technical depth and international field leadership to Creek Transitway, where he leads the design, deployment, and operationalization of gas-based infrastructure, including LNG-to-power, CNG mobility, and downstream systems.

He began his career in Telecoms R&D before transitioning into process engineering, with a specialty in Quality Measurement Instrumentation (QMI), Flow, Gas & Safety (FG&S), and Custody Transfer Metering (CTM). Ivan spent approximately 24 years working in LNG environments, including over 6 years with Shell Nederland Chemie B.V. and 16 years with Nigeria LNG Limited, where he contributed to world-class commissioning, start-up, and maintenance of LNG and petrochemical assets. He has also led training, competency development, and technical assessments globally.

Ivan holds both Bachelor's and Master's degrees in Electrical Engineering (Electronics & Radio Communication) from the University of Zagreb and is a certified Functional Safety Engineer (TÜV Rheinland).

At Creek Transitway, he is instrumental in driving the company's gas-to-transport and gas-to-power innovations, optimizing technical performance, safety, and sustainability.

# Our Management Team

## Oli David Olowhu Chief Operations Officer (COO)

**David** is a seasoned oil and gas professional with over 15 years of extensive experience in the oil and gas industry especially in the upstream sector. As Chief Operations Officer at Creek Transitway Ltd, David brings a wealth of expertise in operations, safety, off-take, and management. His proven track record reflects his commitment to excellence and efficiency, driving operational success and ensuring the highest standards in safety and performance across all facets of our business.

## Ekpedeme B. Elijah

**Ekpedeme** is an accomplished Automation Engineer with 7 years of combined experience in automation, instrumentation, and calibration. Throughout his career, he has played a pivotal role at Automated Process Ltd, delivering technical services to major clients such as Coca Cola, Guinness, Nestle, and 7UP plants across Nigeria. With a strong background in Petroleum Engineering, he brings a deep understanding of complex industrial process making him a key asset in driving Creek Transitway's technological advancement.

# Our Management Team

## **Dr. Solomon Adeleye Ph.D., DIC, PEng Project Director**

Dr. Solomon Adeleye is a Chemical and Environmental Engineer with over 40 years of multidisciplinary experience in the oil and gas, power, and infrastructure sectors across Nigeria, Canada, and internationally. He holds a doctorate from Imperial College, University of London, and is a registered Professional Engineer with the Association of Professional Engineers and Geoscientists of British Columbia (APEG BC).

Dr. Adeleye brings deep expertise in environmental assessment, regulatory permitting, project development and management, energy systems, and stakeholder engagement. His career includes senior roles with WorleyParsons and DeltaAfrik Engineering, and he has led and supported landmark projects for clients including NNPC, Mobil Producing Nigeria, Chevron, and Oando, among others. He has also served as consultant to FOSTER (Oxford Policy Management, UK), advising on Nigeria's gas flare commercialization, gas-based industrialization strategies, and petroleum sector policy reform.

As Project Director for the Creek Transitway initiative, Dr. Adeleye provides strategic technical leadership, drawing on decades of hands-on project delivery and institutional knowledge of Nigeria's energy and regulatory landscape.

# Our Management Team

## Chibuzor Okwor Chief Marketing Officer (CMO)

**Chibuzor** is a seasoned Sales and Marketing professional, currently serving as the Chief Marketing Officer at Creek Transitway Ltd. With a solid foundation in Biochemistry, Chibuzor brings extensive experience in pollution control, toxicology, environmental health, and environmental impact assessments. His unique blend of expertise not only drives strategic marketing initiatives but also ensures that Creek Transitway's operations align with the highest environmental standards and his proven track record in business growth are instrumental in advancing Creek Transitway's mission to revolutionize the energy and transport sectors.

## Engr. Sizah T. Jacob Head Gas Commercial

**Sizah** is a veteran gas commercialization expert with over 30 years of experience in Nigeria's oil and gas sector. He previously served as Head of Gas Commercial and Business Development at NNPC Gas Marketing Limited (NGML), where he led national gas offtake and infrastructure expansion strategies until his retirement.

At Creek Transitway, he oversees commercial structuring, pricing, and long-term supply agreements across our LNG, CNG, and gas-to-power portfolios. His deep industry knowledge strengthens our execution in both upstream partnerships and downstream delivery.

# Our Management Team

**Daniella N. Ikeokwu-**

**Legal Head/Company Secretary**

**Daniella** is a versatile and results-driven corporate lawyer with over eight years of post-qualification experience in corporate and commercial law. As an Associate Counsel at Chief Ladi Rotimi Williams Chambers, Daniella has demonstrated her expertise in navigating complex legal environments. She also serves as a partner at The Legal Stallion, further showcasing her commitment to excellence in legal practice. At Creek Transitway Ltd, Daniella plays a crucial role as our Legal Head and Company Secretary, ensuring robust legal governance and compliance while supporting the company's strategic goals.

**Engr. Dr. A.J.Otoyo (PhD.)**

**Head of Conversion Training**

**Engr. Dr. Otoyo** is a seasoned professional with a distinguished career that bridges both academia and industry. He holds a PhD in Mechanical Engineering and has spent 12 years as a lecturer in the Department of Mechanical Engineering at Akwa Ibom State University, where he has played a pivotal role in shaping the next generation of engineers. Beyond academia, Dr. Otoyo brings 19 years of private sector experience, having held key positions such as Head of Equipment Design, Welding, and Fabrication. At Creek Transitway Ltd, Dr. Otoyo leads our Conversion Training program, ensuring that our team is equipped with the advanced skills required to propel our mission in the energy and transport sectors.

# Our Management Team

## Dr. Ifechidere Sophia Obani (PhD.)

### ESG and Sustainability Lead

**Sophia** is an accomplished Environmental Toxicologist and ESG professional with over a decade of experience in public health, environmental sustainability, and HSE (Health, Safety, and Environment) strategy. She holds a Ph.D. in Environmental Toxicology, a Master's in Occupational Health and Safety, and a Bachelor's in Public Health. Her academic and professional background is reinforced by global certifications such as Associate Environmental Professional (AEP) and COSHH Manager, positioning her as a leading voice in environmental and social governance within Nigeria's energy sector.

At Creek Transitway, she leads the ESG and Sustainability division, overseeing compliance, risk management, and impact reporting across the company's gas-to-power and gas-to-transport operations. She plays a critical role in ensuring the company's infrastructure rollouts are socially inclusive, environmentally compliant, and aligned with Nigeria's energy transition goals. Dr. Obani also guides the company's HSE programs, community engagement strategy, and long-term sustainability roadmap.

## Engr. Muhammad Shuaibu- (Head of Conversion Heavy Duty Trucks and Generators)

**Muhammad** is a seasoned Mechanical Engineer with over 13 years of experience in the energy and automotive sectors. He holds a Master's degree in Industrial Maintenance Engineering and is a certified COREN engineer. His expertise spans plant operations, automobile maintenance, CNG conversion engineering, and project management. Muhammad has played key supervisory roles in the conversion of diesel engines to dual fuel (Diesel+CNG) systems.

# Our Advisory Board

## Chukwuma E. Nwogu

**Chukwuma** is a seasoned Supply Chain Professional and Management Consultant with over 22 years of extensive experience in the oil and gas industry. He specializes in advising startups within the sector, helping them establish and manage lean, agile, and sustainable operations that drive success. Chukwuma has held various key roles with international oil companies (IOCs), both locally and globally, including serving as an Asset C&P Leader at Total E&P UK Limited. He currently serves as the Supply Chain & Local Content Manager at TotalEnergies EP Brasil Ltda., where he continues to make significant contributions to the industry.

## James Agada

**James** is the founder of Ixzdore Laboratories Limited, an innovation hub and consultancy dedicated to creating smart technologies and fostering local talent in the development of cutting-edge solutions. Prior to this, he served as the CEO of CWG Plc, formerly known as Computer Warehouse Group (CWG) Plc. James is a highly respected and innovative technology expert, with extensive experience in consulting, software development, implementation, and support. His versatility and deep industry knowledge have made him a key figure in the tech landscape.

# Our Advisory Board

## Said L. Bobboyi

**Said** is a seasoned infrastructure and energy development professional with over 23 years of experience across the oil and gas, power, telecommunications, and public infrastructure sectors in Nigeria. He has led and participated in the conceptualization, development, and execution of critical national projects, particularly within the gas and power value chains, working across organizations such as the Nigerian Petroleum Development Company (NPDC), DeltaAfrik/Worley Parsons, and the Hydroelectric Power Producing Areas Development Commission (HYPPADEC).

He has served as a Project Consultant and JV Structuring Advisor on multiple independent power projects, LNG feasibility studies, gas commercialization programs, and public-private partnership (PPP) infrastructure models. His most recent roles have involved interfacing with international agencies, embassies, and key government stakeholders on bilateral infrastructure investment initiatives.

With a background in civil and structural engineering and a B.Sc. in Building from Ahmadu Bello University, Zaria, Engr. Bobboyi brings deep technical and strategic insight to Creek Transitway's efforts to scale natural gas solutions across transport, power, and industrial clusters in Nigeria.

## Mohd. Bamalli (Vice-Chairman)

**Mohd.** is a finance professional with over 10 years of experience in infrastructure and energy project financing. He previously served as Managing Director of a consortium of sovereign wealth funds focused on national development projects in Nigeria. A successful entrepreneur and board member in various companies some sectors including mining, ICT, and renewable energy, he now leads project finance strategy at Creek Transitway, driving investment into CNG, LNG, and gas-to-power infrastructure across Nigeria.

# Our Strategic Partners

## Rivers State Government

RIVERS STATE  
GOVERNMENT

**Our collaboration** with the Rivers State Government encompasses the development of natural gas infrastructure dedicated to CNG, specifically tailored to serve the state's transport sector. This partnership, formalized in June 2024, aims to generate employment by training local residents in auto-gas conversion technology, fostering widespread adoption of CNG as a more cost-effective alternative to PMS and Diesel. By reducing transportation costs for people, goods, and services, this initiative is poised to help curb inflation and stimulate economic growth across the region.

## Kogi State Government

**Our partnership** with the Kogi State Government involves the development of natural gas infrastructure to support the state's transport sector. This collaboration, established in 2023, aims to create job opportunities by training local residents in auto-gas conversion technology and to promote the widespread adoption of CNG as a more cost-effective fuel compared to PMS and Diesel. This initiative is expected to reduce transportation costs, stimulate economic growth, and generate additional revenue for the state.

## Our **Strategic Partners**

### **Oilserv Limited**

Oilserv is Africa's leading Oil and Gas Engineering, Procurement, Construction, Installation, and Commissioning (EPCIC) Pipelines and Facilities Company. The company, which was founded in 1992 and commenced operations in 1995, has relied on innovation to become a globally competitive integrated energy company with a history of completing turn- key projects in Nigeria and across Africa while utilizing advanced technologies. Some of their projects includes the AKK Gas pipeline and the PNG line of Oyo state government.

### **Shell Nigeria Gas (SNG)**

SNG is a fully owned Shell company incorporated in 1998 for the downstream distribution of gas to industries in Nigeria. SNG currently operates a growing world class gas transmission and distribution network of over 138km in Nigeria. It operates several distribution systems including Agbara-Ota in Ogun state, the Aba Cluster in Abia State, and the Port Harcourt Cluster in Rivers State.

## Our **Strategic Partners**

### LAPO Micro-Finance Bank

**LAPO MFB**, a leading financial institution in Nigeria renowned for its commitment to improving the lives of low-income earners and micro-entrepreneurs, has joined forces with Creek Transitway, a forward-thinking energy solutions company. This partnership which was executed in July 2024 is dedicated to driving the adoption of Compressed Natural Gas (CNG) within the public transportation sector by providing accessible financing options for vehicle conversion. LAPO's expertise in microfinance, coupled with Creek Transitway's innovative approach to energy solutions, ensures that operators have the necessary financial support and technical resources to make this crucial shift, ultimately leading to reduced operational costs and a positive environmental impact.
