

Company Overview

Durandel Limited is a Nigerian sovereign technology and systems architecture company founded to pioneer the post-extractive economic era. Headquartered in Lagos, Durandel designs and deploys next-generation market infrastructure that replaces scarcity engineering with **abundance circulation** as the default state of economic systems.

Our flagship innovation is **UMEI® (Universal Market Ecosystem Infrastructure)** — the world’s first sovereign regenerative market cloud, purpose-built from Africa to accelerate humanity’s Planetary Civilizational Pivot.

Our Vision

One market ecosystem for Africa.

Our Mission

Organize Africa’s markets and make them easily accessible, efficient and cost-effective.

Strategy

Architect sovereign regenerative market systems that restore ecological vitality, distribute agency equitably, liberate human time, and position Africa as the originator of the next global economic layer.

Market Philosophy: “Scarcity was design. Regeneration is now infrastructure. Africa is enough.”

Core Innovations

UMEI® – Sovereign Regenerative Market Cloud

A modular five-layer sovereign stack that makes regeneration protocol-native:

- **Perception Layer** — Real-time IoT/edge sensing for ground-truth data
- **Persistent Memory (Duralake)** — Immutable audit trails and regeneration records
- **Sovereign Orchestration (Oria)** — Agentic AI for real-time flow optimization and polarity balancing
- **Unbreakable Identity (Docudd)** — Contribution-weighted self-sovereign identity
- **Participatory Governance (PAMIE Chapters)** — Community-driven decision rights with veto power

Foundational Intellectual Property

- **Doctrine of Regenerative Ultrastructure (2026)**
- **Onemolease’s Laws of Regenerative Economics (2026)** — Four laws with six axioms, mathematical formalisms, and proofs
- **Regenerative Surplus Index (RSI) and Gross Regeneration Surplus (GRS)** — Advanced metrics replacing GDP

Supporting Initiatives

- Regenerative Corridor Operating System
- Pamiefund – Tokenized Regenerative Asset Platform
- Regenerative Surplus Dividend Mechanism
- Duranoid (planned) - Humanoid Robotic Assistant
- Duralog (planned) - Mass Cargo Movement System
- DuraSpace (planned) – Orbital extension of Perception Layer
- Redacen (planned) – Network of regenerative data centres

Target Markets & Impact

- **Primary:** Key industrial and strategic trade corridors (starting with Abidjan–Lagos)
- **Clients:** Governments, corridor authorities, enterprises, cooperatives, and development finance institutions
- **Beneficiaries:** Over 400 million smallholder operators and rural communities across Africa

UMEI® enables 3–5x income uplift for participating market operators, ecosystem restoration, and sovereign value retention while delivering triple returns: financial, regenerative, and strategic.

Business Model

Hybrid **Sovereign Infrastructure-as-a-Service (IaaS)** with recurring revenue from:

- Corridor and national licensing
- Platform transaction & subscription fees
- Tokenized asset services
- Advisory, implementation, and white-label deployments

Current Stage: Advanced pre-pilot (technical architecture complete, extensive community co-design with 12,500+ farmers, pilots targeted for Q4 2026).

Headquarters: Lagos, Nigeria
